Art Unit: 1624

Prosecution on the merits of this application is reopened on claims 1, 2 and 20-25 considered unpatentable for the reasons indicated below:

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 20-25 rejected under 35 U.S.C. 102(b) as being anticipated by Ohkuma et al. (US 5,541,181). The claims read on the compound made by the microorganism, strain M990-6, identified as being a species of Micromonospora. The reference depicts the structure of the compound isolated incorrectly. However, the later published correction by Igarashi et al. (in J. Antibiot. 58(5): 350-352 (2005)) revised the structure of the reference.

This anticipation rejection is made on the compound produced by the same microorganism and has the same NMR spectrum as in the prior art (with the difference of solvent peaks). Therefore, the compound claimed was first produced by Ohkuma et al. and the claims read thereon.

Claims 18, 19 and 26 are withdrawn from consideration as being drawn to non-elected subject matter. The restriction was made by telephone during an interview with Mr. Mark Fitzgerald on September 23, 2005.

Art Unit: 1624

If the issue fee has already been paid, applicant may request a refund or request that the fee be credited to a deposit account. However, applicant may wait until the application is either found allowable or held abandoned. If allowed, upon receipt of a new Notice of Allowance, applicant may request that the previously submitted issue fee be applied. If abandoned, applicant may request refund or credit to a specified Deposit Account.
